Professional Experience

Software Development Engineer - Godaddy

4/2021 - Current

- Created react.js dashboards to enable datacenters to make decisions on power and rack usage.
- Updated frontend/backend of server drive wiping and health app to enable datacenters to efficiently monitor and recycle hardware.
- Brought reusable components and hooks to enable developer experience and productivity.

React   JavaScript   Python   Github   Pytest   Jenkins

Full-Stack Software Engineer - American Express

10/2019 - 3/2021

- Worked with React to build corporate card features such as Membership Rewards points.
- Developed REST API endpoints in Java and Spring to provide card microservices such as balances, transactions, and MR points.
- Owned and implemented cache-busting solution in Java and CMS that reduced customer frustration and calls by 50/month, and simplified code deployment.
- Setup Jenkins build pipelines, and upgraded Maven dependencies to reduce vulnerabilities across 20 repositories.
- Upgraded Angular from 5 to 7 along with unit test corrections, enabling improvements on customer and development sides.

React   JavaScript   Java 8   Spring   TDD   Jest   Maven   Python

Applications

Doge Meme Generator

doge.openode.io

- Ability to store, share, and vote on memes, online by storage in PostgreSQL database and REST API in node.js
- Deployed site using Docker, ElephantSQL (PostgreSQL host), and node host. Set up SQL migrations.

node.js   JavaScript   Express   Handlebars   PostgreSQL

Education

- **B.S. in Computer Information Systems - Arizona State University**
- **Certificate in React and node.js - Galvanize**

Interests

After work I like to attend AZ meetups for coding groups. Some of my frequent groups are: React AZ, Hackernest, HackerX. I also like to play free poker in AZ tournaments.
